

H11V2 HARNESS

**NEW H11 - VERSION 2 STANDARD WORKING AT HEIGHTS HARNESS
MADE IN WA**

PRODUCT FEATURES AND INFORMATION

The new version 2 of the H11 Full Body Harness is the first combination harness of its kind. The Version 2 H11 Harness includes updated features from the original H11. It takes the well-spaced upper body features of the standard industrial working harness and combines this with the design of the lower body harness adapted from the Tactical Rescue and Rope Access Harness. **Designed and manufactured in WA.**

H11V2 HARNESS

PRODUCT FEATURES AND INFORMATION

Main Features

- The Saferights H11V2 Harness prioritises lightweight design and superior comfort for prolonged wear in diverse work environments.
- Quick-release buckles facilitate effortless adjustment, ensuring ease of use and efficiency.
- Forged aluminum adjuster buckles guarantee durability and reliability in all applications.
- Features front and rear attachment points, along with a front fall arrest attachment D and rear extension strap, offering versatility for different tasks.
- Rear dorsal D's and confined space pick-up points enable vertical lifting alignment during rescue operations, enhancing safety.
- Integrated fall indicator promptly exposes a red tag upon shock loading, alerting personnel to potential hazards.
- Padded leg straps provide additional comfort during extended wear, making it an ideal choice for professionals across various industries in Australia.
