## FIRE STRYKER | FIRE SUPPRESSION SYSTEM

### PRODUCT FEATURES AND INFORMATION

*The FSS100 is the latest innovation in the fire protection industry*

The FSS100 is significantly lighter than conventional fire protection equipment such as fire extinguishers. It is a cost-effective solution for small to large businesses, households, offices, and all types of vehicles, and can be safely stored for quick and easy access in an emergency.

The FSS100 is designed to be extremely lightweight at only 365 g, making it a practical alternative to traditional fire extinguishers. It is not pressurised, meaning it does not require servicing, maintenance, or refilling like conventional fire protection equipment. This also removes the risk of pressurised containers exploding or malfunctioning.

Unlike traditional extinguishers, the FSS100 leaves no residue after use, significantly reducing clean-up costs and minimising salvage and recovery expenses once the fire has been extinguished.

## LIGHTEST & MOST ADVANCED FIRE SUPPRESSION SYSTEM

### Main Features

- 100 SECONDS OF FIRE SUPPRESSION
- PUTS OUT FIRE CLASS A.B.C.E.F
- LIGHT. COMPACT. PORTABLE. EFFICIENT. SAFE. ECONOMICAL
- NON-PRESSURISED - NO SERVICING/ MAINTENANCE /REFILLING NEEDED
- NON-CORROSIVE. NON-TOXIC. ENVIRONMENTALLY FRIENDLY NO RESIDUE LEFT AFTER USE
- 8 YEAR SHELF LIFE
